

An example of the *Exclusion Booming Tactic*. Actual deployment should be adjusted for local conditions.

An example of the *Free-oil Recovery Tactic*. Actual deployment should be adjusted for local conditions.

Aerial photography of this area is unavailable at this time, but may be included as it becomes available.

Geographic Response Strategies for Western Alaska Subarea, Island Zone

NE Lagoon, WAK-I01

Center of map at 60° 23.75' N Lat., 172° 36.95' W Lon.

This is not intended for navigational use.

ID	Location and Description	Response Strategy	Implementation	Response Resources	Staging Area	Site Access	Resources Protected (months)	Special Considerations
I-01-01 <div>EX</div>	Northeastern Lagoon a. Lat. 60° 23.70'N Lon. 172°36.98'W b. Lat.60° 22.77'N Lon.172°31.62'W	Exclusion Exclude oil from entering the Northeastern Lagoon.	Deploy anchors and boom with skiffs (class 6) at high tide. At each opening in the lagoon, place 500 ft. of protected-water boom in a chevron pattern in front of the entrance to the lagoon. Complete the arrays by placing 60 ft. of tidal seal boom on each leg. If surf conditions don't allow deployment off the beach, back the array back into the lagoon. Tend throughout the tide.	Deployment Equipment 1000 ft. protected-water boom 240 ft. tidal seal boom 6 ea. anchor systems Vessels 1 ea. class 3 1 ea. class 6 Personnel/Shift 5 ea. vessel crew/general techs Tending Vessels 1 ea. class 3 1 ea. class 6 Personnel/Shift 5 ea. vessel crew/general techs	Vessel Platform	Via marine waters Chart 16006	Fish- intertidal spawning-herring (June) Marine mammals-seals, sealion Birds-waterfowl, seabird and shorebird nesting Habitat- exposed rocky shore, marsh, peat shoreline Human use-subsistence, commercial fishing	Vessel master should have local knowledge. Title 41 permitting required from ADNRR. Surveyed: not yet Tested: not yet
I-01-02 <div>FO-S</div>	Northeastern Lagoon Nearshore waters in the general area of: Lat. 60° 23.75'N Lon. 172°36.95'W	Free-oil Recovery Maximize free-oil recovery in the offshore & nearshore environment of Northeastern Lagoon depending on spill location and trajectory.	Deploy free-oil recovery strike teams upwind and up current of the Northeastern Lagoon. Use aerial surveillance to locate incoming slicks.	Deploy multiple free-oil recovery strike teams as required to maximize interception of oil before it impacts sensitive areas.	Vessel Platform	Via marine waters Chart 16006	Same as I-01-01	Vessel master should have local knowledge. Use extreme caution, shallow waters with shifting channels and bars.

NOTE: Sensitive resource information can be found on other maps which can be accessed through the sensitive area section of the Western Alaska Subarea Contingency Plan: http://dec.alaska.gov/spar/perp/plans/scp_wak.htm.
